

## ONE SEAM FLYING GEESE BLOCKS

Cut two 3" squares of background fabric  
Cut one 5 1/2" x 3" "goose" piece

Lay one background block on table RIGHT SIDE UP.

Fold the 5 1/2" X 3" piece in half WRONG sides together (do not press this piece in half). Align the raw edges opposite of the folded edge along the top of the 3" square.

Complete the sandwich by laying the second 3" square RIGHT SIDE DOWN, matching all raw edges. You may pin at this point, if you are more comfortable sewing with pins.

Notice that there is a 1/4" between the bottom of the background piece and the folded "goose" piece. This is perfect.

Stitch along ONE side of the sandwich from the top of the raw edges through the fold to the bottom.

Open the sandwich and press the "goose" down in place. Press the "one" seam open. (Note that this seam will be bulkier since it has 4 layers of fabric instead of two, hence the reason for pressing it open)
